 - MVC frameworks
 - REST APIs
 - Git
 - Bash
 - CI/CD tools

Work Experience

RECORRIDO + BUSBUD I (FULL-STACK) MAR 2024 - DEC 2024

- Designed a transition between two platforms, focused on delivering a new interface in an efficient and functional way.
- Built REST APIs to support web features for millions of daily visitors
- Developed various features, adapting the front-end to efficiently handle dynamic changes from the back-end.

RECORRIDO I (FULL-STACK) JAN 2022 - MAR 2024

- Development of multi-currency support features to facilitate expansion into new markets.
- Maintained the sales platform's operations and developed new features.
- Development of bulk email systems to prevent misuse of the platform.
- Integration of various tools to optimize message delivery.

ARCHDAILY I (BACKEND DEVELOPER) JAN 2017 - NOV 2021

- Developed and maintained software for the most visited architecture network in the world
- Development of a mini social network for architects.
- Support financial management through the development of an internal billing system that optimizes and improves accounting processes.
- Contributing to the content team through the implementation of features that optimize their processes and improve the management of their tasks.

EVERFACTOR I (BACKEND DEVELOPER) FEB 2016 - SEP 2017

- We automated key processes, optimizing business operations and significantly reducing financial losses.
- I contributed to the integration of the SAP system with a payment approval model for training expenses.
